

An Unbeatable Team of Versatile Wood Pellet/Multi-Fuel Appliances

Quality You Can Trust

Your appliance will provide you with a lifetime of service and safety. You can trust our state of the art electronics, safety sensors, diagnostic capabilities, thermostatic operation, and self-ignition to provide complete control against down drafts, blocked venting, open doors or a lack of fire. With this kind of **unbeatable quality**, your appliance is designed to detect negative pressure and shut down before dangerous emissions would ever enter your home.

Simplicity You Desire

Every appliance is designed to be simple to use. With over four decades of industry experience, our appliances are manufactured to provide unparalleled conveniences and eliminate hassles. You'll appreciate the **unbeatable simplicity** of filling the hopper, setting the controls, and pushing a button. There's never a need to tear up paper, chop kindling, or split wood. We take great pride in the minimum amount of effort it takes to operate and maintain your appliance.

Efficiency You Demand

No more skimping on heat to save on bills! No more wrapping in blankets in fear of turning up the thermostat. The **unbeatable efficiency** rate at which the heat will pour into your home will have you amazed at what you've put up with for too long. You'll love a warmer house for less money. Using both convectional and radiant heat output, your appliance will heat the objects and the air in the room.

Reliability You Expect

Over 42 years ago, Mike Haefner, owner of American Energy Systems Inc. and inventor of the corn stove and subsequent product line, made a decision to provide products with **unbeatable reliability** to last a lifetime. Customers overwhelmingly tell us how much they appreciate the ongoing reliability of their stoves, as well as our emphasis on technical support and customer care found nowhere else in the industry. Visit us online at **AmericanEnergySystems.com** or call **1-800-495-3196** to learn more.

CROSSFIRE FLEX

Unbeatable Elegance

The **Countryside** is the original certified corn burning biomass appliance that started it all! Burn corn or wood pellets for up to 56,000 BTU's and up to 75 pounds of fuel capacity at a time! The beauty of the Countryside is the incredible amount of heat it provides for absolutely minimal work.

You'll fall in love with the sleek look and simple operation of the **Baby Countryside**. Homeowners heating with a Baby Countryside become vocal advocates for its fuel versatility and ease of use. Its slimmer style is perfect for many homes, but don't underestimate its heat output. The Baby Countryside is equipped with the hottest technology, auto ignition system, and offers numerous design options.

Save big with the **Winchester** flex-fuel stove. If you live in the worst winter conditions imaginable, this stove is up to the challenge. It provides heat with or without electricity, thanks to its advanced DC technology options. It is equipped with the auto ignition system. If propane bills have you shaking your head, the Winchester may be the perfect choice from our **Unbeatable Team of Appliances!**

Get ready for 99% heat efficiency with the **Little Rascal Pellet Stove**. This thermostat ready wood pellet stove offers extreme convenience, savings, and options. It's smaller in size, but its heating capacity is astounding. Lighting this stove is a breeze with the onboard auto ignition system.

The **Harvester** is a uniquely attractive source of heat offering ample warmth, efficiency, and versatility. The ability to hold 75 pounds of corn or wood pellets means you can depend on constant heat day and night. Should you experience a shortage of one fuel the Harvester will burn a variety of wood pellets, corn and other Biomass specialty fuels today and into the future.

The **Crossfire-Flex** fireplace insert is ready to install and is approved for use with zero-clearance fireplaces. This fireplace requires a simpler less expensive venting method (than a traditional, costly chimney), comes with five heat level settings, and an auto ignition system. You'll enjoy incredible savings with this fireplace that is as versatile as it is beautiful; it's equipped to burn wood pellets, corn, and other renewable fuels.

It paid for itself in savings the first year, and continues to keep our heating costs down.

Holly H.

So far I've only spent \$400 to heat the house vs the \$1200 I was spending on propane.

Dean K.

We are truly blessed to have the stove, and did the right thing by buying a Magnum stove.

Laurie M.

It's beautiful, and your entire company should be proud of the product you are producing.

Brenden H.

Going on ten years with your stove, and still going strong.

Del & Pattie C.

We can't believe the amount of heat the stove puts out.

Matt M.
