

AES Technical/Information Bulletin **Magnum Countryside 3500 series Augers**

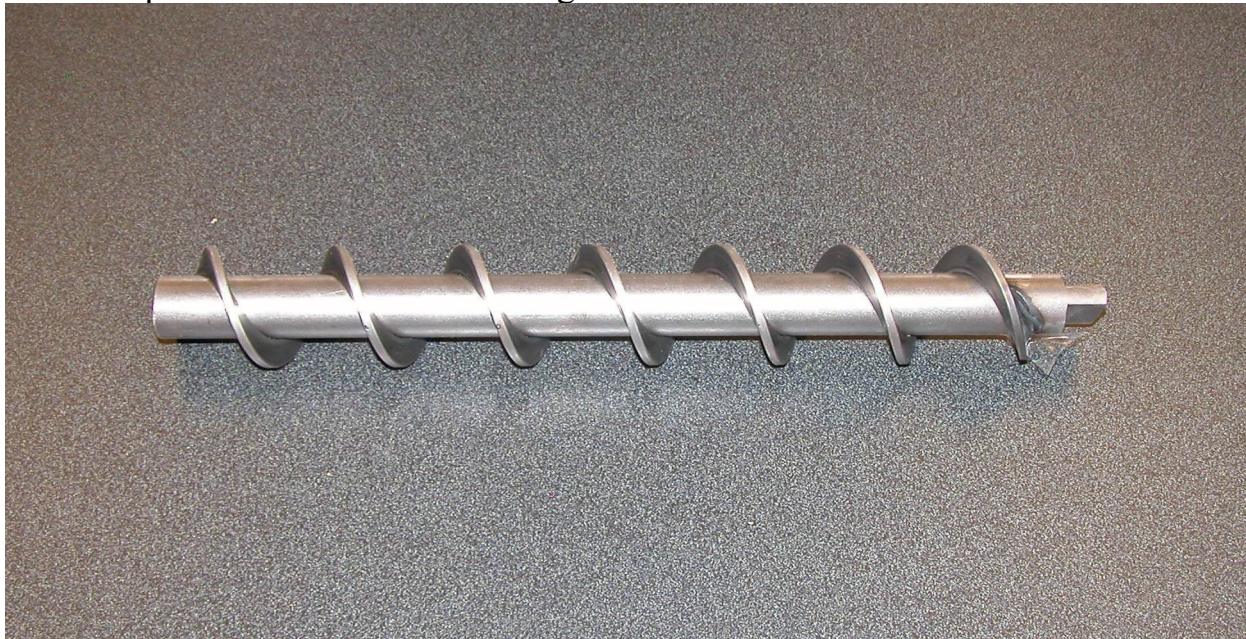

Product models covered: Magnum Countryside 3500 series

Topic: This technical bulletin will be addressing Magnum Countryside augers; styles, descriptions, and part numbers.

Auger A: MF3553 – New auger 13.5” long, 1 ½” wide flighting. The auger is attached to the auger motor by a 5/8” shaft collar

Auger B: MF3530 – Old style auger, 11.5” long, 1 ½” wide flighting the auger motor has a coupler attached to it for the auger to slide into.

Auger C: MF3520P Wood Pellet – Auger with 1/8 flighting, used on older style units with 1" ID auger tube. Normally used with wood pellet fuel but can be used for corn. Will increase fuel feed rate on corn so the board would need to be adjusted.

Auger D: MF3520 Corn Pellet – Auger bit with 1/2 wide flighting, heavy duty auger, used with older style units with 1" ID auger tube. Normally used when feeding corn only, although it can be used for wood pellets
