

AES Technical Bulletin

MF3645 Maintenance Kit

Product models covered: Countryside 3500 Series, MagnuM 6500/7500 Furnaces

Topic: This technical bulletin will be addressing the MF3645 Maintenance Kit, cleanout door, how to install the door and how to clean the appliance with the door.

Tools needed: Rubber mallet.

Procedure:

- ◆ Take the door off the appliance. Sometimes a rubber mallet is needed to tap on the bottom of the door to lift it up.
- ◆ Install the cleanout door on the appliance. Line the cleanout door up to the hinge pins and press down on the door to install it on the appliance (see picture #2).
- ◆ Close door and attach ash vac to tube as shown in picture #3.
- ◆ The first time you use the kit, drill 1/4" hole in pipe caps.
- ◆ Insert air nozzle tube into appliance bending tube as needed.
- ◆ Turn ash vac on and blow air through the nozzle bending tube as needed to insure tubes have been cleaned.
- ◆ Move tube to other pipe cap and repeat process.
